**Fundamentals of Surveying - □□□□**

2 • Surveying has to do with the determination of the relative spatial location of points on or near the surface of the earth • It is the art of measuring horizontal and vertical distances between objects, of measuring angles between lines, of determining the direction of lines, and of establishing points by predetermined angular and linear measurements

**Engineering Surveying - M. Can İban**

In engineering surveying, either or both of the above formats may be utilized in the planning, design and construction of works, both on the surface and underground. At a later stage, surveying techniques are used in the dimensional control or setting out of the designed constructional elements and also in the monitoring of deformation movements.
